Funded by the European Union in the framework of the EU Health Programme (2008-2013) in the frame of a service contract with the Consumer, Health, Agriculture and Food Executive Agency (Chafea) acting under the mandate from the European Commission. The content of this report represents the views of the Andalusian School of Public Health (EASP) and is its sole responsibility; it can in no way be taken to reflect the views of the European Commission and/or Chafea or any other body in the European Union. The European Commission and/or Chafea do not guarantee the accuracy of the data included in this report, nor do they accept responsibility for any use made by third parties thereof.

Individual Task

Please answer the following questions individually:

1. Remember a migrant or member of an ethnic minority community you have provided health care to recently, and identify elements of intersectionality in his/her situation.

2. Describe your own personal and professional position, taking in to account several dimensions of intersectionality, and identify its potential influence in the communication with health care users.

3. Identify potential strategies for addressing intersectionality in the process of providing health care to migrants or members of ethnic minority communities.
