Instructions to print this brochure > Print > Properties > 1. Orientation > Landscape; 2. Binding position > left bind

This leaflet has been produced with assistance of the EU health Programme (2008-2013) in the frame of the EC Service Contract Nr. 2013 62 09 with the Consumers, Health and Food Executive Agency (CHAFEA) acting under the mandate from the European Commission. The content of this leaflet is sole responsibility of the project's consortium members; it can in no way be taken to reflect the views of the European Commission and/or CHAFEA or any other body of the European Union.

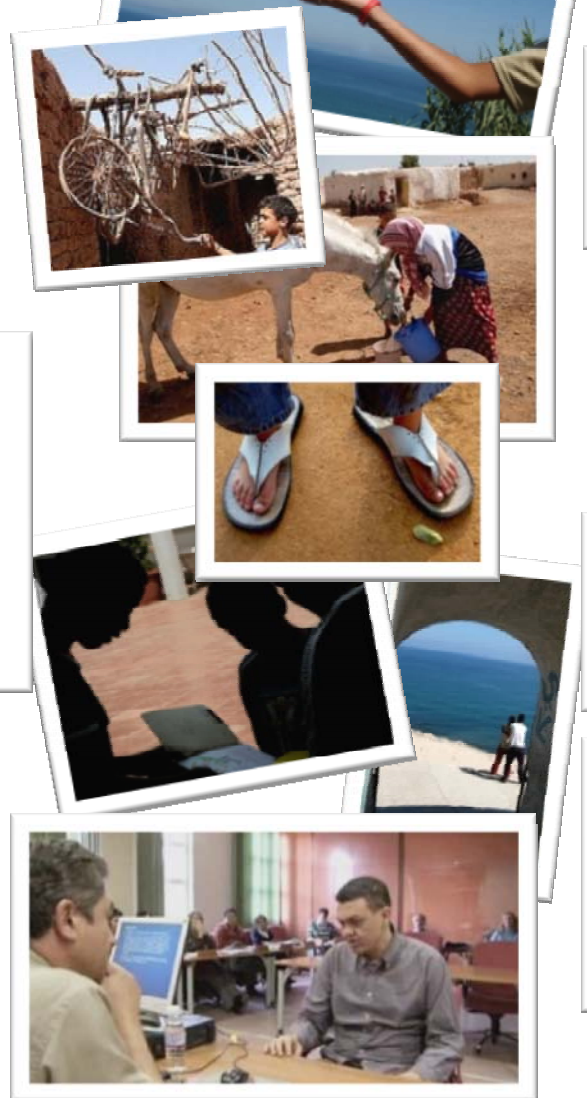

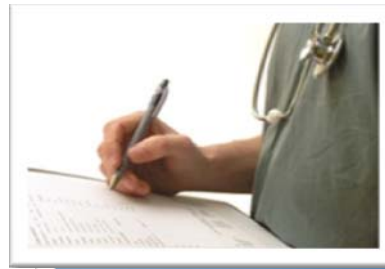

Funded by the European Union in the frame of the EU Health Programme (2008-2013)

The MEM-TP project aims to improve access and quality of health services for migrants and ethnic minorities in the EU and to reduce observed inequities. To achieve this aim, the consortium works to:

Present an overview of the situation of migrants and ethnic minorities in Europe regarding their access to and use of health services, and the extent to which services are adapted to their specific needs.

Building on previous experience, create a framework, a training programme and validated teaching-learning materials for all health care providers, aimed at improving the accessibility, quality and appropriateness of care provided to migrants and ethnic minorities in the EU.

Develop and apply a structured process, enabling those with primary responsibility in training and continuing education of health care providers in each involved country to take ownership of their training programmes, through active adaptation of the materials to their local situation and needs.

WP 1

Review the migrant and ethnic minorities' situation in the EU and identify common challenges and best practices to feed into the training programmes.

WP 2

Training materials development: review of existing training materials.

WP 3

The content of new training materials, production of the training package.

WP 4

Training of trainers, six pilot training programmes and evaluation.

WP 5

Final versions of the materials, the evaluation report summarising the challenges and opportunities during the pilot trainings, and dissemination of the results.
